PRINTABLE CHECKLIST

JULY 2026 / 5 MINUTE SELF-AUDIT

# THE 10-OUT-OF-10 WEBSITE CHECKLIST

A practical self-audit for naturopathic doctors

## LOOK GOOD. WORK HARD.

A polished website should help patients find you, trust you, and book with minimal friction. Work through all 10 items, tick each card, and total your score on the final page.

| | | | | | |
|---|---|---|---|---|---|
| 10 | CHECKS | 5 | FOCUS AREAS | 1 | CLEAR ACTION PLAN |

# Make the next step obvious.

The first screen should explain the practice and make booking feel effortless.

## 1 Put a clear booking action above the fold

WHY IT MATTERS

Visitors should see the next step before they scroll. Use direct action language and send people to the intended scheduler, practitioner, or appointment type.

CHECK FOR

- [ ] Primary booking button is visible immediately
- [ ] Button says exactly what happens next
- [ ] Jane App or scheduler opens the right option
- [ ] A contact page is not the only way to book

QUICK TEST Can a first-time visitor start booking in one tap?

## 2 Say who you help, what you do, and where

WHY IT MATTERS

Your homepage headline should identify the audience, the care offered, and the location. Specific language helps patients self-select and helps search engines place you.

CHECK FOR

- [ ] The homepage has one clear H1
- [ ] A service, area of focus, or patient question is named
- [ ] The city or service region is included
- [ ] Supporting copy makes the next step clear

QUICK TEST Can someone explain who, what, and where in five seconds?

# Feel credible before the first visit.

A human presence builds confidence; a fast mobile experience keeps that confidence intact.

## 3 Show the practitioner, not generic stock imagery

WHY IT MATTERS

Health care is a high-trust choice. Feature a current, professional photo of the practitioner and place their registered name and correct ND designation close to it.

CHECK FOR

- [ ] A real practitioner photo appears on the homepage
- [ ] The face is visible early in the page
- [ ] Full name and ND designation are nearby
- [ ] Primary imagery feels specific to the practice

QUICK TEST Does the homepage feel like a person, not a template?

## 4 Make the mobile experience genuinely fast

WHY IT MATTERS

Test performance on a phone, not only a desktop. Prioritize quick loading, responsive interaction, and visual stability using PageSpeed Insights and Search Console field data.

CHECK FOR

- [ ] Useful content appears quickly on mobile
- [ ] The layout does not jump while loading
- [ ] Images are right-sized and use a modern format
- [ ] Fonts and scripts do not block the first view

QUICK TEST Can a patient read and act without waiting or re-tapping?

# Help Google - and patients - verify you.

Strong local signals connect the practice to its city; proof points remove uncertainty.

## 5 Build local search signals into every layer

WHY IT MATTERS

Make the city and profession unambiguous in visible copy and page metadata. Keep the Google Business Profile complete and publish structured practice details.

CHECK FOR

- [ ] Page title combines profession and city
- [ ] Location appears in the H1 and opening copy
- [ ] Google Business Profile details are complete
- [ ] Applicable LocalBusiness or Organization schema is present

QUICK TEST Would Google confidently match this practice to its city?

## 6 Make professional trust signals easy to verify

WHY IT MATTERS

Show factual, verifiable information: the name used on the CONO Register, correct title, education, registration, location, fees, areas of focus, and what happens during a first appointment. Do not use testimonials, review badges, or links that promote patient reviews.

CHECK FOR

- [ ] Name matches the CONO Register
- [ ] Dr., if used, is followed by ND or Naturopathic Doctor
- [ ] Address, phone, fees, and focus areas are clear
- [ ] No testimonials or review promotion are used

QUICK TEST Can a patient verify the practitioner without searching elsewhere?

# Give every important topic a useful home.

Focused service pages and structured answers make the practice easier to find and understand.

## 7 Create a dedicated page for each priority service

WHY IT MATTERS

A single services list cannot answer every patient's question. Give each core focus area a useful page that speaks to the need, the approach, and the next step.

CHECK FOR

- [ ] Every priority focus area has its own page
- [ ] Copy uses language a patient would search
- [ ] Local intent is included where it feels natural
- [ ] Each page links clearly to booking

QUICK TEST Is there a useful landing page for each search need you intend to answer?

## 8 Structure content so AI search can understand it

WHY IT MATTERS

Clear headings, concise answers, relevant schema, and consistent credentials create a strong foundation for AI-powered search. No tactic can guarantee a citation.

CHECK FOR

- [ ] FAQ sections answer real patient questions
- [ ] Answers are factual, clear, and easy to scan
- [ ] Appropriate organization and FAQ schema is used
- [ ] Names, services, and credentials stay consistent

QUICK TEST Could a search system extract an answer and verify its source?

# Create momentum - then measure it.

Useful publishing opens new routes into the site; analytics shows which routes perform.

## 9 Publish a small, focused content library

WHY IT MATTERS

Begin with a manageable set of useful posts that answer questions patients already ask. Choose specific topics, publish at a sustainable pace, and connect every article to relevant information.

CHECK FOR

- [ ] The site has a manageable set of useful articles
- [ ] Each post targets one specific patient question
- [ ] A realistic publishing cadence is in place
- [ ] Articles link to relevant services or next information

QUICK TEST Does each article open a new door from search and lead somewhere useful?

## 10 Connect analytics and search performance data

WHY IT MATTERS

Use GA4 to understand visits and actions, and Search Console to understand queries and rankings. Review both regularly and track the booking steps that matter.

CHECK FOR

- [ ] GA4 is installed and receiving data
- [ ] Search Console ownership is verified
- [ ] Booking clicks or completions are measured
- [ ] Queries, pages, and conversions are reviewed monthly

QUICK TEST Can you explain which pages and searches are producing bookings?

# ADD UP YOUR SCORE.

Count the large checkbox on each item you can confidently tick today.

MY WEBSITE SCORE

____ / 10

Pick one high-impact gap to fix first.

## 0-3

### Fix the foundations

Start with booking clarity, mobile speed, and local search signals.

## 4-6

### Build systematically

Close the highest-impact gaps, then deepen services and proof.

## 7-9

### Performing strongly

The remaining work likely compounds through content, AEO, or measurement.

## 10

### Well maintained

Maintain the standard, keep publishing, and review performance monthly.

## Your first improvement sprint

1. Highest-impact gap: _____

2. Owner + target date: _____

3. How success will be measured: _____
